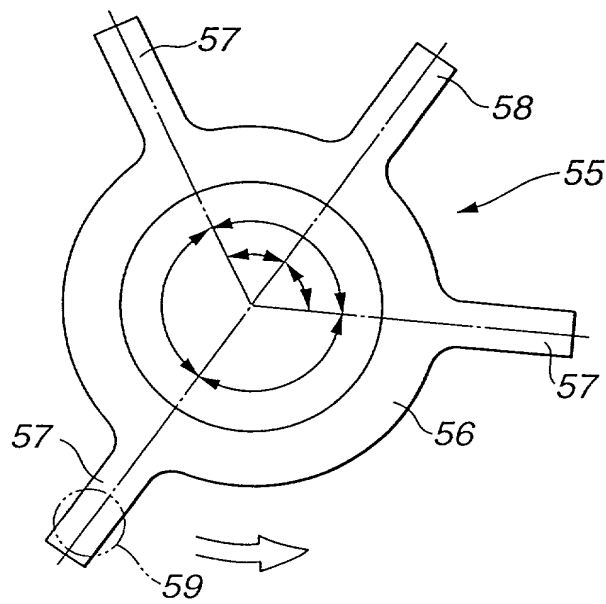

FIG. 7

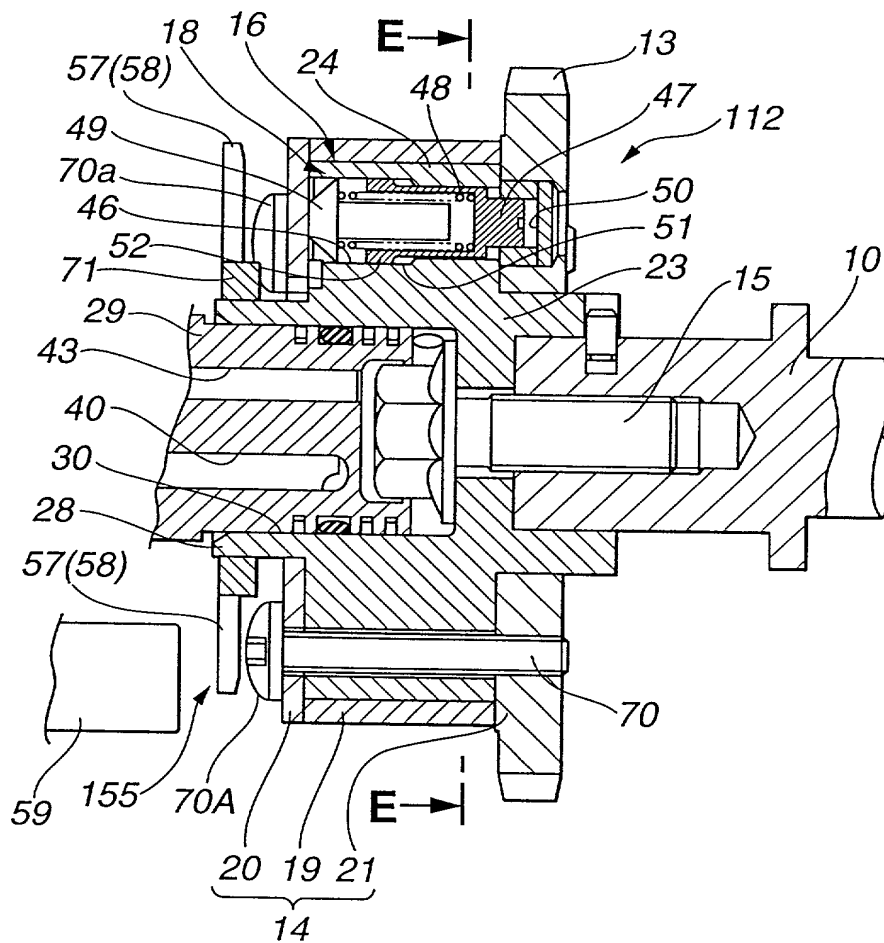

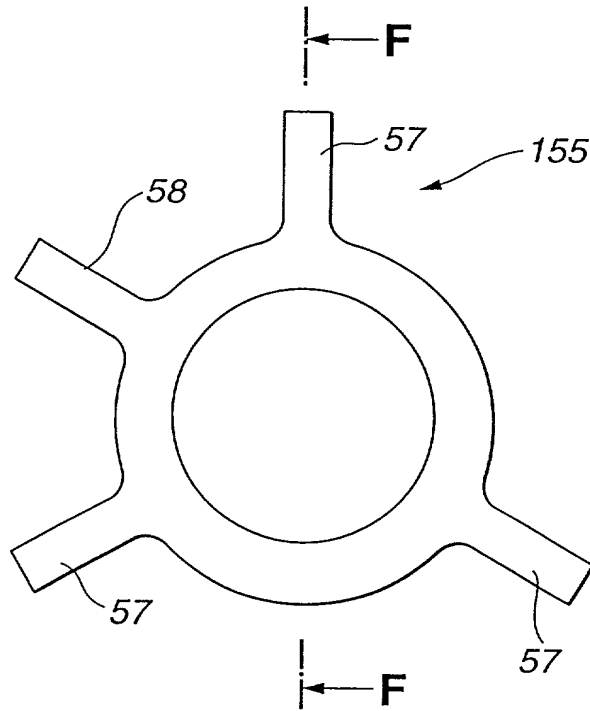

Figure 1 is a top-down cross-sectional view of a circular gear-like component. The component has an outer ring with teeth (14) and an inner hub (18). The gear is divided into several segments (22) by radial spokes (24). Various internal features are labeled, including a central hole (15), a central shaft (16), and a central hub (18). The gear is shown in a cross-section, with dashed lines indicating internal features. The label 'D' is used to indicate a specific dimension or feature.
